Customer Reviews

The older I get the more I turn to natural remedies and prevention measures. I love that this book gives me great ideas for avoiding illnesses and treating them if I do get them without man,are chemicals.

This book has clear, medically sound information. There were many useful preventative measures, such as carrying your own writing pen so you 're not using public ones. Along with pages of healthful foods were recipes for soothing, immune boosting drinks. A Good resource!

I was convinced by reading this to make some changes in order to be less susceptible to illness as well as how to ease symptoms and speed the return to health if I do catch a cold or the flu. I feel I could implement what was suggested. I'm very glad for this excellent resource.

Colds and flu brrrr... usually they won't kill you but the bug you a lot and do not let you feel healthy and vibrant. But I don't like to be always on artificial meds so this book gave me a ton of ideas that I am loving. I feel good now and enjoy the new "meds". Thanks

I was really surprised at some ideas that were given to help with the flu and a cold.Also the information explaining the difference between the flu and a cold was very interesting.The information in this book I will help if you follow it.

Simply put, it's short, bulleted information that's easy to tab and refer back to, but nothing new. But it was free so good reference guide.

No nonsense, easy to read and understand advise for all ages. Short read but full of information for anyone looking to stay healthy.

Is very encouraging in that there is a way to help ones self feel better with food and herbs. Thank you're lip for your own body
