Electronic Communications

Synopsis

In electronic communication, the message to be communicated is converted into an electrical signal by an Electronic device called the transducer. These messages may originate in different physical forms. For example, the message may be a voice signal, which generates mechanical vibrations of the air column. Some information may contain data regarding temperature or pressure variations. Often the message may be visual in nature.

Book Information

Hardcover: 672 pages

Publisher: Delmar Cengage Learning; 2 edition (April 1, 1992)

Language: English

ISBN-10: 0827350848

ISBN-13: 978-0827350847

Product Dimensions: 8.8 x 8.6 x 1.3 inches

Shipping Weight: 3.2 pounds
