Customer Reviews

I previewed this book while substituting in an elementary class. Neither too elementary nor too difficult, can be tailored to children from eight to fifteen years. My own second grade class will be doing a unit on nutrition and I also wanted to introduce the idea of good hygiene. This book has units on all the necessary practices to ensure a healthy body and mind, plus there are test questions at the end of each chapter. A must for elementary teachers and great for parents.

We used this set to fulfill homeschool high school Health requirement. It was easy to read and follow. I recommend this for a student who merely needs the health requirement, and is not interested in a health industries career. I would say the reading level is at about 6th grade.
